2. Product Feature

- (1) For irrigation of crops, spacing from 10cm to 60cm.
- (2) For surface and subsurface irrigation.
- (3) High strength and durability.
- (4) Highly resistance to clogging. Molded emitters stand up to challenging water and organic fertilizers.
- (5) Maximum flexibility for storage, transport and handling.
- (6) Blue (white or yellow) line on the surface is available, insures proper outlet placement.
- (7) It helps to maintain the looseness of soil.
- (8) Package is customizable.

3. Application

- (1) Irrigation for orchards, vineyards, fruit, vegetables, field crops and green house.
- (2) For grape, strawberry, melon, corn, coffee, tea, tomato, cucumber, carrot, potato, onion, etc.

Note: 1. Have drip tape emitter facing up that make sure we don't make any clogged emitters from any mud or soil; 2. Land is flat; 3. Filter 120 Mesh; 4. Prevent insect/rodent damage; 5. If left above ground something called "magnifying glass" or "lens effect" damage can occur if plastic mulch is placed directly over drip tape; 6. Extra length should be left at both ends to allow for connection.
